Education

•Indian Institute of Information Technology, Nagpur

Aug 2023 – July 2027

B.Tech, Computer Science and Engineering, specialization in AI/ML

Nagpur, India

Experience

• AI Engineering Intern | [Ekaant](#)

May 2026 – Present

- **Product Strategy:** Spearheaded 0-to-1 strategy and PRD for a **multi-agent Therapist EHR SaaS**, automating clinical workflows and eliminating administrative friction.
- **Multi-Agent AI Workflows:** Engineering a **LangGraph orchestration layer** integrating LLM APIs across **6 specialized agents** (Supervisor, Clinical, Admin, Safety, etc.) to automate SOAP note generation, patient insights, and risk monitoring.

Personal Projects

• [Intelligent News Platform](#) | *React (Vite), FastAPI, LangGraph, Groq (Llama-3.3-70B), SSE*

[Live Demo](#)

- **Built an Intelligent NewsApp** with multilingual translation and personalized feed using **FastAPI + LangGraph**; implemented a **3-node multi-agent pipeline** (Fetch → Filter → Format), grounded briefings + Q&A, and **culturally adapted translation** in 3 languages with **batch processing**.
- **Engineered SSE real-time streaming**, relevance scoring across up to **50 live headlines**, and robust **caching + deterministic fallbacks** — demonstrating data-first experimentation and feedback loop design for measurable performance improvement.

• [MCP-Powered Agentic Healthcare Scheduler](#) | *React, FastAPI, MCP, PostgreSQL, Twilio*

[Live Demo](#)

- **Designed a production-ready Agentic Appointment Assistant** featuring role-based patient/doctor chat, automated booking, notifications, and **Google Calendar synchronization** via **Groq API tool-calling**.
- **Used MCP** as the orchestration layer, enabling the LLM to reliably execute backend tools via a **unified /mcp endpoint** for real-time availability checks, booking, reporting, and secure messaging — end-to-end AI workflow automation.

• [LinguaBridge \(Cross-Lingual RAG\)](#) | *Next.js, FastAPI, Llama-3, FAISS, IndicTrans2, HuggingFace*

[Live Demo](#)

- **Orchestrated a 3-node cross-lingual architecture** processing Odia queries using English vector databases with two **translation models** (47 and 33 BLEU) for Od-to-Eng input translation and output generation.
- **Designed a 4-stage hybrid RAG pipeline** (Dense, Sparse, Fusion, Reranking) to retrieve **top-k (1–7) chunks** from thousands of documents, enabling **zero-shot inference** with a 70B LLM in under 5 seconds.

Technical Skills and Interests

Programming Languages: C, C++, Python, JavaScript

Web Technologies: React, Next.js, FastAPI, Node, MCP

Database Systems: MySQL, PostgreSQL, Vector DBs

AI & Automation: LangChain, LangGraph, APIs, PyTorch, RAG, Prompt Engineering, n8n (familiar)

Tools: Docker, Weights & Biases, Git, Github, Power BI, Jupyter Notebook

Others: SQL Analytics, A/B Experimentation, OOP, DBMS, OS, CN

Positions of Responsibility

• Team Lead, Post-Production | *Tantrafiesta '25, IIIT Nagpur*

Sept 2025 – Oct 2025

- Directed post-production for flagship event media using Premiere Pro and After Effects; delivered high-retention promotional content.

• Creative Intern | *MU20 School of Opportunity* | [Certificate](#)

Dec 2024 – March 2025

- Co-directed on-field visual content with the Director of Photography; produced viral content garnering **100K+ views** within 72 hours of launch.

Certifications and Achievements

– Fundamentals of Deep Learning — [NVIDIA](#)

2025

– Complete Data Science, Machine Learning, Deep Learning & NLP Bootcamp — [Udemy](#)

2025

– **Blen360 Hackathon Finalist** — Advanced to final offline round; **top 150 out of ~2,000 registrations**. 2026
